Ficus 'Bambino' use **Scotts Osmocote Premium Potting Mix for Indoor Plants**. It comes pre-mixed with a 6-month slow-release fertilizer and specialized coir and perlite. For ongoing care during spring and summer, supplement with **Scotts Osmocote Pour+Feed for Indoor Plants**.

What You Need

- **Potting Mix:** Scotts Osmocote Premium Potting Mix for Indoor Plants (compost-free to prevent fungus gnats).
- **Optional Booster Fertilizer:** Scotts Osmocote Pots, Planters & Indoors Controlled Release Fertiliser if your mix needs extra slow-release prills down the track.
- **Liquid Feed:** Scotts Osmocote Pour+Feed for Indoor Plants for active seasonal growth boosts

- **Potting Steps**
- Choose a clean pot with good drainage holes.
- Partly fill the container with the pre-fertilized potting mix.
- Place the Ficus 'Bambino' in the centre and fill around the root ball gently.
- Water the pot thoroughly to settle the soil and activate the built-in nutrients.
